

## Why a Contactless Boutique Hotel?

Unstaffed hotels are a growing trend in the United States and other places around the world. This all started long before 2020! Vacation rental companies like VRBO, Home Away, Hostel USA, and most well-known - Airbnb, have been operating this way for years. And that is only a handful of the options that exist. To go along with the changing times, even large hotel chains have discontinued services such as valet, room service, daily cleaning, and personal baggage delivery. Some of these services may never return. Travelers and tourists are adjusting to the changes and many would tell you that they prefer this type of stay.

The Landing Hub offers shared bunk rooms and private rooms that sleep from 1-10 people. We can accommodate your comfort level while traveling in these new and uncertain times. How do we do it you may ask? Well, to start your stay off right, you will have Contactless Check In. The Landing Hub has automated doors that will be activated with a code generated specially for you, from the time you check in until you check out. You will automatically receive your activated code for the door to your room and the exterior doors on the day of your check in. Because of products like Yale locks and services like Guesty and Remote Lock, the technology still does its job for last minute bookings and late check ins. The services that we use will be working at the Landing Hub even if we are not.

During your stay, you will likely notice enhanced cleaning protocols. The owners of the Landing Hub have owned and operated a commercial cleaning company in St. Louis and the surrounding areas for many years. During 2020, we serviced many essential businesses. We have been trusted to keep St. Louis clean. We will take all that knowledge of products and services, and use it to train staff, implement protocols, and maintain the cleanest, safest environment possible.
